

Realization of Bio-diesel until October achieved 1.44 Million kL

Tuesday, 30 December 2014 | 11:22 AM | [Ferial](#)

DGNREEC – Realization of bio-diesel utilization until October 2014, achieved 1.44 Million kL of 2014 target such as 4 Million kL

The detail of achievement bio-diesel mandatory for subsidized fuel-oil sector (BBM PSO) has achieved 962,594 kL, and for non subsidized fuel –oil (BBM non PSO) has achieved 308,666 kL, and for power plant sector has achieved 162,256 kL.

Meanwhile the realization of pure plant oil (PPO) and bio-diesel utilization for PT. PLN power plant until October 2014 achieved 165 thousand kL. In this way, the utilization of bio-diesel and PPO for PLN power plant can be accelerated by bio-diesel supply above 20% to fulfill the demand of the company for diesel power plant (PLTD) as well as their own procurement for bio-fuel types of PPO.

The total of bio-diesel utilization until October 2014 could save foreign exchange by reducing US \$ 1.08 billion diesel imports.

Pertamina has implemented the project procurement phase III for 730,000 kL FAME procurement 2014-2015, and based on the projection, there would be 40,000 kL/month increasing of the realization on October-December 2014. Totally, Pertamina projected that realization of bio-diesel utilization on 2014 is about 1.53 Million kL.
